To Whom It May Concern,

I am writing to recommend Bharathikannan Nithyanantham, who has been an outstanding master student and intern with our company, Virtual Retail GmbH.

During his internship, Bharathikannan demonstrated exceptional versatility and capability in handling a wide range of tasks, including data labeling, literature review, and coding. His dedication to continuing his work in Computer Vision was evident, and we subsequently engaged him as a master student to work on video object detection using depth information. When he transitioned to his master thesis project, Bharathikannan worked independently to review relevant literature and selected the most pertinent sources to delve into deeply. He has shown the ability to think independently about technical issues and test out different ideas with strong coding skills. By the end of his master project, he had developed a comprehensive understanding of Transformer-based object detection frameworks and applied modifications to enable the use of depth information.

Bharathikannan's ability to break down complex problems into manageable tasks and his dedication to resolving issues were particularly impressive. His technical skills, problem-solving abilities, and proactive approach make him an outstanding candidate. In my opinion, Bharathikannan is an exceptional candidate who possesses strong technical skills, problem-solving abilities, and a proactive approach.

If you require any further information, please do not hesitate to contact me.

Kind regards,

Dr. Junli Tao
