To Whom It May Concern

**Letter of Recommendation
For Bharathikannan Nithyanantham**

Siegen, 10.08.2023

I am writing this letter to recommend Bharathikannan Nithyanantham based on his exceptional contributions during his work in my Intelligent Systems Group at the University of Siegen.

Bharathikannan worked in my group for a period of one year, during which he demonstrated excellent dedication and commitment to his work. He actively engaged in research related to AutoML and Recommender Systems. His contributions greatly benefited our team and yielded impressive results leading to various publications.

During his time with us, Bharathikannan actively collaborated with our Ph.D. students, and participated in various research projects. He successfully completed five projects, each focusing on different aspects of the field. He showed excellent skills in dataset research, recommender systems development, research in AutoML, and also machine learning in general. His projects helped our Ph.D. students in their research and also the department as a whole. In addition to his technical skills, he displayed very good teamwork and communication skills. He actively collaborated with our Ph.D. students, effectively contributing to discussions and project planning.

In conclusion, I highly recommend him for further studies or career opportunities in the field of machine learning. I am confident that he will continue to make significant contributions and achieve great success.

Sincerely,
